BRICKMASTER™ BUILDING STEPS:

SPACE POLICE
NOVA STAR CRUISER!

PART 1

The Nova Star Cruiser is a tough, hi-tech security cruiser that the Space Police use to transport the most important evidence and escort the most important starships across the solar system. Its krellonium-alloy cargo safe can resist anything short of a plasma burst torpedo, and its quad-hyperion coils generate a Force shield bubble to resist attacks and impacts, as well as sealing the cockpit against the vacuum of space. When threatened by interplanetary lawbreakers, it can even launch magna-lock rockets to freeze space-crook vehicles in place for a speedy arrest!

You can build the BrickMaster-exclusive Space Police Nova Star Cruiser using pieces from 5973 Hyperspeed Pursuit!
